Title of the research

1. ## Introduction (expected ¾ of the page)

   Start 1 or 2 sentences of the global information of the healthcare system then to your research domains (ex: about the wallet, you explain about the identity; trust management, you explain about the use of trust in healthcare system; reputation, you also explain about the use of reputation system)

2. ## Problematic (expected ¼ of the page)

3 of you will have different problematics. I do not think you also have the same problems.

Draw a diagram of the use case and give the explanation to the problem of the use case

3. ## Objectives (expected 1 to 1 ½ of the page)

Point to 1 or 2 objectives

Then, you try to explain the objectives that you mentioned above.

   a. Research questions

Here, you questions yourself regarding to extend of you said in the proposed solutions.

   Ex: objectives – we allow patients to access to their digital identity

   to success above objective, we will design a SSI system in which patients can use their wallets in the smart phone for accessing to their digital identity.

   Research questions: What are technologies to build the digital wallet?

4. ## Literature reviews (expected 1 to 2 of page) (including technologies that you learnt)

5. ## Current results (expected 1 page)
   a. Use case diagram of the research
   b. Results (you can print screen of one part in a technologies that you are doing)

6. ## Conclusion and future works (expected 1 page)
